# Stealth Glider

Follow the directions below to make the Stealth Glider. For the best plane, make sure your folds are tightly creased.
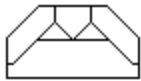

1. Start by placing the paper on the table with the point of the airplane facing up.

2. Fold the top corners in toward you. Make these folds on lines A.

3. Fold the tip down on fold line B.

4. Fold the outside wings down on lines C.

5. Fold in half on the center line D.

6. Fold each wing back on lines E.

7. Fold lines F up. Hold the plane from underneath, give it a gentle throw and watch it soar. Personalize the glider by decorating it with crayons and markers.
